EDUCATION

Smith College, Northampton, MA

Expected May 2021

B.A. in Computer Science and Minor in Statistical Data Sciences

Relevant coursework: Data Structures, Google Iterm Android Workshop, Intro Software Engineering, Assembly, Intro Statistical Data Sciences, Calculus III

SKILLS

Coding Languages: Java, Python, HTML, CSS, JavaScript, R, SQL

Software: Android Studio, Amazon Web Services (S3, Lambda, EC2, CloudFront), Git, Docker, Angular

WORK EXPERIENCE

Software Engineering Intern, Thomson Reuters, Carrolton, Texas

May - August 2019

⇒ Created a real-time status monitoring page for Thomson Reuters' consumer facing products to display current as well as historical status.

⇒ Developed backend using AWS Lambda and DynamoDB with an automated user interface using AWS EC2, Docker and GitLab runner.

Teaching Assistant & Programming Mentor, CS Department, Smith College

September 2019 - Present

⇒ Hold drop-in sessions to clarify and debug Python programs as well as mentor separate groups of 4 weekly in better understanding and working with Python.

Teaching Assistant, Google Iterm Android Workshop, Smith College

January 2019

⇒ Clarified assignments, helped with debugging Android apps and mentored individual groups as they created their final Android apps centered around college and academics.

PROJECTS

The Cloud Grandet, Javascript, AWS

⇒ A chrome extension, as well as an extension on the AWS CLI, that makes you aware of the costs you're making on AWS services before purchasing them.

Chic, HTML, CSS, Javascript, **Chic 2.0**, Android Studio

⇒ A business solution to conquer check splitting dilemmas worldwide, developed as a website at HackSmith18 as well as an android app that allows customers to pick the items they want to pay for.

LEADERSHIP

Events Chair, Smithies in CS, Smith College

May 2019 - present

⇒ Help organize, facilitate and host the organization's events as well as assemble a hackathon committee that will plan Hack Smith 2020 and develop the front-facing website.

Instructor, Girls Who Code, Smith College

Sep 2017 - present

⇒ Facilitate learning for middle school girls who lack any coding experience in order to create projects in Python and Scratch and websites using HTML, CSS and JavaScript.
